- Planning Water Solar Project

### Malawi Human Resource Director

Greetings,

I hope that this newsletter finds you well. I am excited that we will now be constantly reaching out to you on some of the great things that the ministry is doing through your kind support here in Malawi.

Lingston Chingana

### Our International Director

On January 9, 2021, Our Malawi Leadership welcomed our International Director, Marvin Tarlton, together with one of our International Board members, Tim Bonomo here in Malawi. Coming back to Malawi after almost a year was one of the greatest feeling everyone had in welcoming our two leaders from America. Despite the ongoing pandemic, we were able to hold different events that are outlined in this newsletter.

### Multiplication Network Ministries.

The second week of January we welcomed one of the Directors of Multiplication Network Ministries( MNM) to our Operation SAVE compound in Lilongwe. The focus of the four-day meeting was to enhance the planting of Churches across all local unreachable areas in Malawi. Our Operation SAVE ministry's uniting goal is to preach and spread the word of God to all people. Therefore, partnering with MNM is one of the best avenues to enhance our ministry's vision. We hope that partnering with MNM will support this common goal that we both carry for the Glory of God.

### Meeting with Hands on Africa

Hands on Africa has an education program that trains pastors across African countries. Hands on Africa provides lessons that in the end gives an Associate and Bachelors degree in Theology. Prior to meeting with one of the local volunteer lecturers from Hands on Africa, we met with Multiplication Network Ministries. The idea from meeting with MNM finds itself fulfilled by having well trained pastors with an accepted Theological Degree from the education program that is offered by Hands on Africa. This is all to the common and uniting goal of preaching and spreading the word of God. Our vision of planting churches and training pastors is highly supported by the same vision that Hands on Africa carries.

### Solar Water Project (SWP)

Our ministry has a water project, Water For Life Boreholes, which drills new boreholes and repairs existing boreholes. This year, our water program is going to be implementing a Solar Water Project where new boreholes will be given to schools and hospitals across the Lilongwe area. This will be one of the first big projects our ministry will be conducting this year.
